DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-12, and 19-20 drawn to a diagnostic agent and therapeutic agent comprising an anti-human VEGF receptor Flt-1 antibody.

Group II, claim(s) 13-18, and 21, drawn to a method for diagnosing a disease caused by tumorigenic change of a hematopoietic cell comprising reacting cells or tissue with an anti-human VEGF receptor Flt-1 antibody.

Group III, claim(s) 22-28, drawn to a method of treating a disease caused by the tumorigenic change of a hematopoietic cell comprising administering to a patient an anti-human VEGF receptor Flt-1.

2. The inventions listed as Groups I-III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

The technical feature linking Groups I-III appears to be an anti-human VEGF receptor FLT-1 antibody. However, Shitara *et al* (EP 0882799A1) teach an anti-human VEGF Flt-1 antibody (see abstract and page 3 lines 42-43)

Therefore, the technical feature linking the invention of Groups I-III do not constitute a special technical feature as defined by PCT Rule 13.2 as it does not define a contribution over the prior art.

Art Unit: 1642

3. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

- VEGF receptor Flt-1 antibodies: KM1730, KM1731, KM 1732, KM1748, and KM1750;
- Fusion Partners: radioisotope, a protein, or a low molecular weight agent

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

4. The claims are deemed to correspond to the species listed above in the following manner:

VEGF receptor Flt-1 antibodies -- Claims 3, 9, 15, and 24; and

Fusion Partners -- Claims 6, 12, 18, and 27

The following claim(s) are generic: 3, 6, 9, 12, 15, 18, 24, and 27.

5. The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons:

The technical feature unifying the instant invention appears to be an anti-human VEGF Flt-1 antibody of which is already disclosed in the prior art by Shitara *et al* (see above). The species of antibodies and fusion partners are not so linked because each is a specific and distinct entity that has different functions and characteristics.

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
